

LEAFY

FOR HYDROPONIC
PRODUCTION AND VERTICAL
FARMING

Experience the
Leafy choice

**EVERYWHERE,
CLOSER TO YOU**

Vilmorin is a brand from **Vilmorin-Mikado**, a Franco-Japanese seed company specialized in creating, producing, and marketing vegetable seeds for professionals since 1743. As a responsible partner in the vegetable food chain, **Vilmorin-Mikado** is committed to helping better nourish people.

Its extensive, unique, and original range is distributed in over 100 countries, meeting a variety of needs all over the world.

Experience the **Leafy choice**

Close to the rapid evolution of the market, **Vilmorin-Mikado** offers a full range of high quality Leafy seeds. Its dedicated teams develop innovations adapted to the entire industry.

WHAT DOES HYDROPONIC PRODUCTION AND VERTICAL FARMING MEAN?

Today, consumers are more and more attracted to clean, healthy and tasty products. That is why hydroponic production is gaining popularity worldwide. One of the most popular plants to grow in a hydroponic system and Vertical farming is leafy green vegetables like lettuce. Vilmorin-Mikado, as a major global Leafy Player, has in his portfolio several varieties suitable for these growing systems.

VARIETIES SUITABLE FOR HYDROPONIC SYSTEMS AND VERTICAL FARMING

The varieties suitable for hydroponic production have the following benefits:

Color intensity

Uniformity of the shape and the crop

Fast and compact growth

Tip Burn tolerance

IN VERTICAL FARMING or Plant Factory we grow crops in a total closed controlled environment (artificial light, temperature, CO2...) and plants are growing mainly vertically in stacked layers.

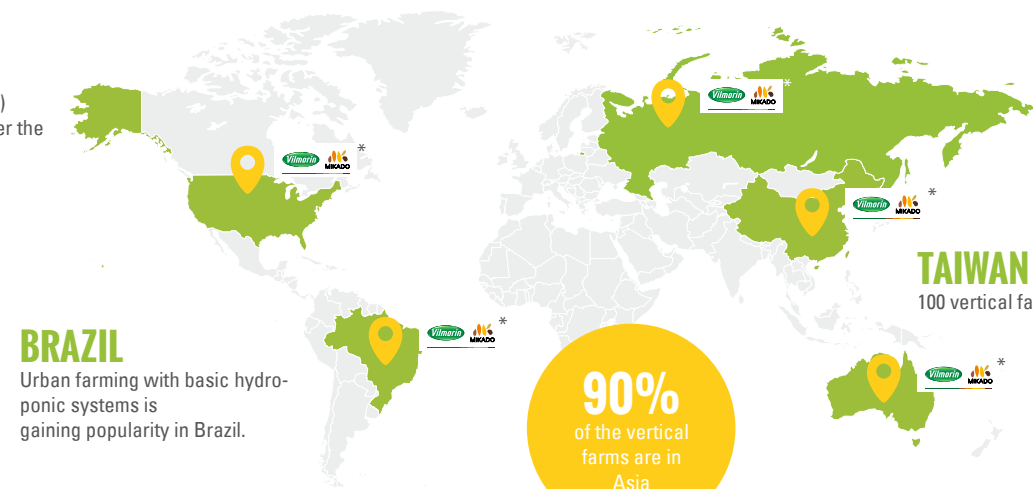

HYDROPONIC PRODUCTION is a method of growing plants without soil, by using instead mineral nutrient solutions in a water solvent. Several techniques of hydroponics with partial controlled conditions are existing. It can be open or closed systems with or without artificial light.

HYDROPONIC PRODUCTION AND VERTICAL FARMING WORLDWIDE

USA

Various CEA (Controlled Environment Agriculture) farms are created all over the U.S. and Canada.

CHINA

Already 10 farms and 160 will be built in the coming years.

JAPAN

More than 200 vertical farms.

TAIWAN

100 vertical farms.

BRAZIL

Urban farming with basic hydroponic systems is gaining popularity in Brazil.

90% of the vertical farms are in Asia

* Vilmorin-Mikado subsidiaries locations in all hydroponic and vertical farming production areas

NEWCUT /// MF6914

- Typology: Multileaf type Lollo.
- Leaves: Very curly and incised.
- Shape: Very compact.

RESISTANCE:
HR: BI:16-35EU

CELESTI ///

- Typology: Butterhead.
- Leaves: Smooth leaves.
- Shape: Well balanced, half open to open head, intermediate to large volume.

RESISTANCE:
HR: BI:16-34,36EU / Nr:0
IR: LMV

LIRICE /// BVP30173

- Typology: Batavia.
- Leaves: Thick leaves, curly tips.
- Shape: Open type, intermediate volume, very beautiful shape.

RESISTANCE:
HR: BI:16-28,30-32,36EU / Nr:0
IR: LMV

TONALE /// BVP30173

- Typology: Batavia.
- Leaves: shiny blond leaves.
- Shape: good volume and nice shape, half open type.

RESISTANCE:
HR: BI:16-25,27,28,30-32,34,36EU

MENTHOLE /// BVA8542

- Typology: Batavia.
- Leaves: Very serrated nice leaves.
- Shape: Intermediate volume.

RESISTANCE:
HR: BI:16-36EU / Nr:0

EXQUISE ///

- Typology: Batavia.
- Leaves: Light green shiny leaves.
- Shape: Half erected, open type.

RESISTANCE:
HR: BI:16-28,30-32EU
IR: LMV / Fol1

BLOND TYPE

MIGNONE /// BVP15232

- Typology: Batavia.
- Leaves: Curly leaves.
- Shape: Intermediate plant volume, rustic.

RESISTANCE:

HR: Bl:16-36EU / Nr:0
IR: LMV

UPPERCUT /// MF6929

- Typology: Multileaf.
- Leaves: Curly blond leaves with good homogeneity.

RESISTANCE:

HR: Bl:16-32,34-37EU
IR: LMV1

NAVARONE /// BVP6179

- Typology: Batavia.
- Leaves: Thick leaves with bright color.
- Shape: Heavy head, open type, well balanced.

RESISTANCE:

HR: Bl:16-28,30-32EU

BLOND TYPE

MARADONE /// BVP1170

- Typology: Batavia.
- Leaves: Thick leaves with attractive color.
- Shape: Very well balanced.

RESISTANCE:

HR: Bl:16-32,34,36EU / Nr:0
IR: LMV / Fol1

QUATOR /// DIP10387

- Typology: Oakleaf.
- Leaves: Intermediate leaf size with shiny green.
- Shape: Good volume.

RESISTANCE:

HR: Bl:16-32,34,36EU / Nr:0

QUITO /// DIP10851

- Typology: Oakleaf.
- Leaves: Mid-blond green shiny leaves. Blistered leaves with intermediate lobes.
- Shape: Good volume.

RESISTANCE:

HR: Bl:16-36EU / Nr:0
IR: LMV

PADAWANE /// DIA8964

- Typology: Oakleaf.
- Leaves: Smooth leaves and intermediate lobes.
- Shape: Well balanced.

RESISTANCE:

HR: Bl:16-36

MATINALE /// BVA352

- Typology: Batavia.
- Leaves: erected thick and blistered leaves.
- Shape: Open type.

RESISTANCE:
HR: Bl:16-25,27,28,30-32,34EU

YAMBU /// ROM19247

- Typology: Romaine.
- Leaves: Thick and shiny dark green leaves.
- Shape: Medium size, closed head.

RESISTANCE:
HR: Bl:16-36EU / Nr:0

MKS-L502G ///

- Typology: Butterhead.
- Leaves: dark green leaves.
- Shape: Unique shape, loose heading compact lettuce.

SUCRETTE /// ROM20201

- Typology: Mini Romaine.
- Leaves: Thick and blistered leaves.
- Shape: Half open head, medium size and good weight.

RESISTANCE:
HR: Bl:16-29,32,34EU
IR: LMV:1

DARK GREEN TYPE

INTERCUT /// MF15012

- Typology: Multileaf.
- Leaves: Medium thick and crunchy leaves, fine stem, finely serrated leaves up to the basis. Excellent leaf size uniformity.
- Shape: Semi-flat shape, large head.

RESISTANCE:
HR: Bl:16-32,36EU / Nr:0

QUECHUA /// DIP8314

- Typology: Oakleaf.
- Leaves: Dark green leaves.
- Shape: Well balanced.

RESISTANCE:
HR: Bl:16-32,34,36EU / Nr:0
IR: LMV

BATAICE /// BVA3883

- Typology: "Reine des glaces" type.
- Leaves: Smooth foliage and serrated thick leaves (like iceberg).
- Shape: Nice shape.

RESISTANCE:
HR: Bl:16-32,34,36EU / Nr:0

OFELIA ///

- Typology: Butterhead.
- Leaves: Thick dark green leaves with nice internal yellow white color.
- Shape: Good size.

RESISTANCE:
HR: Bl:16-30EU

ALCALINE /// DIPA11111

- Typology: Oakleaf.
- Leaves: Serrated leaves with brown red color.
- Shape: Large head.

RESISTANCE:
 HR: BI:16-36EU / Nr:0
 IR: LMV

RED TYPE

NIGHTCUT /// MFA7176

- Typology: Multileaf.
- Leaves: Fine leaves with good size.
- Shape: Good size.

RESISTANCE:
 HR: BI:16-36EU / Nr:0

M16-006 ///

- Taste: Spicy taste.
- Typology: Mizuna.
- Leaves: Green shiny leaves.

UPLAND CRESS ///

- Taste: Sweet and unique cress taste.
- Typology: Garden Cress.
- Leaves: Small dark oval leaves. Fines stems.
